Description

In the top box:

- add the commune (between the id and the operation name);
- delete the address (which is also often a repetition of the operation name), and move it either in the location section or in the top fields of the sheet.

In the top fields, adapt the alignment of the *Status* field to the others.

History

- In the relations tab, relations between operations should be displayed either in the order in which they have been added, or in alphanumeric order; not in the reverse order of addition as it is currently.
